To Whom It May Concern

Re: Master Oliver Smith

D.O.B: 04/06/2020

This letter confirms that Master Oliver Smith has been assessed at Sunshine GP Clinic and is currently receiving ongoing care for developmental and sensory needs.

Based on my clinical assessment and review of his medical history, I support and recommend his participation in warm-water hydrotherapy. Hydrotherapy may assist with gross motor development, balance, coordination, strength, mobility, body awareness, sensory regulation, and overall physical wellbeing.

At the time of assessment, there are no known medical contraindications that would prevent Master Oliver Smith from participating in supervised hydrotherapy sessions. It is recommended that all hydrotherapy activities be undertaken under the guidance of an appropriately qualified individual and in accordance with the provider's safety procedures.

Hydrotherapy is recommended as an ongoing intervention to support his functional goals and participation in therapy.

Should you require any further information or clarification regarding this recommendation, please do not hesitate to contact our clinic.

Yours sincerely,

Dr Emily Carter
